

**GM Report
PVH Subdistrict
July 18, 2018**

NWDC Water Project:

- Workmanship Issues – We should be able to provide the final metallurgical analysis on the bad service line connections to KR Swerdferger soon. Next step will be a meeting.
- Water Losses – We are no longer seeing the water loss issues. South Metro Fire has agreed to use a hydrant meter on the fire hydrant near the fire station. We have agreed to phase out the locked hydrants in Chatfield East and Chatfield Estates; the hydrant locks will stay in place in Titan Road Industrial Park.
- We continue to get complaints from residents about revegetation and grading/erosion issues. TST is working with the contractor to resolve.
- We had an additional 7 connections in Chatfield East, Chatfield Estates/Acres and Plum Valley Heights during the second quarter of 2018. We will remit \$1,264.59 each new connection to Douglas County for a total of \$8,852.13 in County Tap Fees for Quarter 2 of 2018.
