

**GM Report**  
**PVH Subdistrict**  
**February 19, 2020**

**Information only**

- There are still 3 residences that have not paid their System Development Charge and have not connected to the system.
- One resident made a partial payment of \$5,000 in 2019 and recently paid the remaining balance of \$10,000. Because the System Development Charge was due in full August 1, 2019 and she made no arrangements for a payment plan, we have assessed interest charges on the unpaid balance.
- There are now 8 properties that have paid their System Develop Charge, are being billed the monthly Water Treatment and Distribution charge (\$35.14) and the Water System Replacement Fund (\$3) but have not connected to the system.
- At Douglas County's request, we have developed a scope of work for TST to complete a study to identify alternatives to provide wastewater service to the Emergency Vehicle Operations Center on Moore Road. Any wastewater facilities to serve the County could also serve the Titan Road Industrial Park.

**Inclusions:**

- No recent requests
