

**GM Report  
PVH Subdistrict  
July 17, 2019**

**Information only**

- We did the final warranty walk-through of the NWDC Project with the contractor and have provided a punch list of items to be addressed.
- We continue to have a good response to our last letters reminding residents that they have until August 1, 2019 to connect. We have 130 properties connected.
- We have identified several properties that have installed their service lines and connected to the water main, but have not paid their System Development Charge or had their meter installed. Under the Rules and Regulations, if a property is connected to the District's water main, regardless of whether they're actually receiving water, they are officially connected and constitute an active account. We have begun billing them for the Monthly Base Charge as active accounts.
